PAPERLESS SOLUTIONS™ SIMPLIFYING THE PATIENT INTAKE PROCESS...

Customizable Paperless Solution from intake to checkout.

Tired with dealing with patient intake forms, consent forms, the sheer volume of paper being processed per patient. Smart Solutions offers an easy way to automate the process and eliminate paper. We have developed a process to convert existing forms to PDF so a patient can fill out the forms at home via their home computer or in the office. Their signatures are then captured via an electronic signature pad and all be transferred to your document management system. Ask for a demo today!

PAPERLESS PATIENT INTAKE SOLUTION

Savings in time,
printing toner, mailing,
follow-up and data
entry and re-entry

Turnkey solution per
your business workflow

Tailor our technology to
fit your business
practice rather than
remodel your business
to fit the technology

Quickly and efficiently
gather data
electronically

Complete forms can be
archived and ported to
your data management
system eliminating the
need for double entry

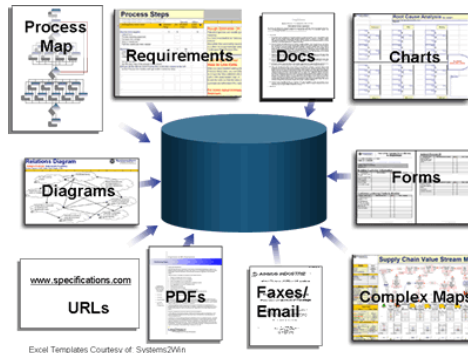

PAPERLESS SOLUTIONS™

SIMPLIFY THE PATIENT INTAKE PROCESS (CASE STUDY)

Medical Practice goes “Paperless”

One medical practice finally threw their hands in the air and surrendered to the Paper Problem. Dr. G. finally said we are doing something wrong, we are not fixing the problem...just adding to it. He turned to Paperless Solutions to help him “find the way” in the Paper Jungle. We created a dynamic form for his whole staff to use. Every patient is different...the form is dynamic and the nurse selects which forms a patient gets and the patient will only see those forms. The nurse or patients types in their name and signs a digital signature pad.....that’s it, NO PAPER, NO COPIERS, NO FILING OR SCANNING....Just move the patient-named file into the EMR and that’s it.... One practice saw a reduction in toner of \$23,000.00, saved 16 cases of paper and 190 hours weekly in manual paper shuffling and document scanning.
